PeerFinder for iMessage is a program for Mac and iOS that creates a private messaging app using a message service that is integrated with the Apple messaging app in Apple's iPhone, iPad, iPod Touch and Apple Watch devices. Once the message service is installed and PeerFinder for iMessage configured, you can send and receive messages from your friends to your iMessage program. This article describes how to install the PeerFinder message service on your iPhone or iPad, as well as how to use it. PeerFinder Message Service on the Apple App Store The PeerFinder for iMessage program is available on the Apple App Store. Install PeerFinder on iPhone Tap the button that says, "Get Free." You can then tap on the app to install it. Then, enter your Apple ID and password. The app will begin to install. Tap the button at the bottom of the screen. You will then have to confirm that you want to allow PeerFinder to use your Apple ID to send and receive messages. The PeerFinder app will use your Apple ID and your location to send and receive messages, so make sure you confirm that you want PeerFinder to have access to this information. Tap "Enable" to continue. You can then return to the main screen. How to set up PeerFinder on iPhone Now that the PeerFinder app is installed on your iPhone, open it and tap "Welcome". Then, tap "Use". You will be asked for your Apple ID and password. A screen will then appear that shows your Apple ID and your username. Tap "Next". You will then have to accept the terms and conditions. You will then be taken to the PeerFinder messages page. Tap "Sign Up". You will then have to enter your email address and your password. When you have filled out all of the required information, tap "Sign In". You will then be presented with a list of your friends. You can tap on any of them and they will be added to your list. You can send messages to your friends, tap on the "Menu" button and select "Mess 82157476af"
