LIP6 - Antipaedo : query-based survey - Mozilla Firefox

Fichier Edition Affichage Historique Marque-pages Outils Aide

http://complexnetworks.fr/survey/index.php

Antipaedo survey

This survey aims at designing a system for automatic identification of paedophile queries. It consists in a list of queries entered by users in a P2P system. For each query, we also display the queries entered just before and just after by the same user.

Please indicate for each query, based on itself and the previous and next ones, if you consider it as a paedophile query or not.

Some recommendations

Please try to avoid the "I don't know" answer. If you do not understand a query but have no reason to think that it is paedophile, then it probably is not.

Also keep in mind that you are tagging one query: if it is not paedophile, then do not suppose that it is because of the previous and next queries only. These two queries are provided to help you if you have serious doubts only.

You are not required to tag all queries in a page, nor to fill all the pages of the survey. You may give some answers, push the "Submit your answers" button at the bottom of the page, and come back later to continue. It must be clear however that the more answers you provide, the more you help us.

Your session will expire after 15 minutes without activity. Do not forget to validate your answers (even if you only partially filled the form) before this delay.

If you have any question or comment, please contact Manhieu.Latapy@lip6.fr.

Thank you very much for your help.
